# TC<sup>®</sup> ENVIROPRIME<sup>®</sup> II

Water displacing primer for all TC Enviro Products

### THE TAPECOAT COMPANY

A Division of The Chase Corporation  
P.O. Box 631, Evanston, Illinois 60204-0631, USA  
1527 Lyons Street, Evanston, Illinois 60201, USA  
Telephone: 847-866-8500 800-758-6041  
Fax: 847-866-8596 800-332-8273

### Basic Use

TC Enviroprime II is a specially prepared primer that exhibits preferential wetting capabilities to readily coat surfaces prior to application of TC Enviro Products.

### Composition

TC Enviroprime II is a petrolatum based material that is specially prepared for preferential wetting of surfaces.

Represented by:  
**SCHRADER CO. SALES, LLC**  
Ph 425-377-1550  
Fx 425-377-0408  
info@schraderco.com

### Technical Data

Color: Light Brown  
Specific Gravity: 0.8 - 0.9  
Thickness: Apply to 4 mils minimum  
Meets Standards: ANSI/AWWA Standard C-217.

### Surface Preparation

Surface should be clean. Remove any loose rust and scale, dust and dirt, marine growth and other foreign materials.

### Primer Application

Apply TC Enviroprime II by hand (glove) or mechanical means to assure preferential wetting of the surface above or below the water line to a minimum thickness of 4 mils (.004").

### Technical Service

The Tapecoat Company sales and service representatives are located in all major metropolitan areas throughout the United States and Canada. Tapecoat agents are also strategically positioned around the world. In addition, laboratory facilities and complete technical services are available from the home office in Evanston, Illinois.
